

CCSS and MPG Announce Marketing Alliance to Benefit IBM i Customers

May 6, 2009 – **CCSS USA Corp (CCSS)**, and Midrange Performance Group Inc. (MPG), today announce a new marketing alliance that will unite the system monitoring and capacity planning expertise of both organizations to better serve the requirements of their common customers, namely, users of IBM® Power Systems™ running IBM i and System i™ servers.

The new initiative will offer existing customers greater access to an extended, rich knowledge base as both companies engage in technical information sharing and seek out new areas of synergy between their solution families. Ray Wright, CEO of CCSS says, “Cohesive industry alliances such as this will substantially benefit IT Managers that face a complex landscape of system issues, many of which include dependencies or interactions with other areas of the system. For them, solutions that can accommodate a ‘big picture’ vision of their needs are unquestionably more valuable.”

MPG, developer of Performance Navigator and Power Navigator, is a leading provider of capacity planning, performance management, and problem determination support for the IBM i and AIX/Linux platforms, respectively. CCSS is a leading developer of several software products including QMessage Monitor, QSystem Monitor, and QRemote Control that help users monitor and manage IBM i servers. “This alliance will enable us to serve our customers in a more effective and cost efficient way,” said Randy Watson, President, Midrange Performance Group. “Between our two companies, we cover the full range of system management requirements for the IBM i customer.”

The solutions of both companies seek to ease the work load of managers and operators by ensuring their system resources are utilized with maximum efficiency in their demanding 24/7 environments. With this shared objective as a firm foundation for the new agreement, IBM i customers can benefit from the natural synthesis between the two companies and their solutions to achieve genuine value, economy and productivity from their systems, now more than ever.

“We were pleased to be able to advise Midrange Performance Group on this alliance, which we believe will greatly benefit both companies and their customers”, said Robert J. Chalfin, CEO of The Chalfin Group Inc.
